

People's Manifesto

**Carriacou &
Petite Martinique**

You. Me. Us Shaping the
Next Five years

CANDIDATE MESSAGE

"We will measure progress through clear milestones and public reporting, and communities will remain involved in reviewing priorities and implementation. Together, we can build islands that are resilient, productive, inclusive and ready for the future."

HON. TEVIN ANDREWS
CANDIDATE FOR
CARRIACOU AND PETITE
MARTINIQUE

Dear residents of Carriacou & Petite Martinique

This Constituency Development Plan reflects listening to residents across Carriacou and Petite Martinique and bringing their priorities together into a responsible programme for the next five years.

My fellow residents, you have spoken clearly about the future you want: safer roads and reliable drainage; dependable water and health services; stronger schools and skills training; support for fishers, farmers and small businesses; better facilities for young people and older persons; cleaner communities; and public services that reach every village, especially Petite Martinique.

This document respects those contributions. It does not simply repeat every request as an immediate promise. Major projects must be designed, costed, funded and delivered properly. Where government must work with utilities, transport operators, businesses, community groups or development partners, those dependencies will be identified clearly. Our commitment is to begin promptly, report on progress and complete what can responsibly be delivered within the five-year term.

We will continue rebuilding after Hurricane Beryl while preparing our islands for future challenges. We will place maintenance alongside construction, because roads, drains, schools, clinics, wharves, playing fields and public buildings only serve people when they are kept in good condition.

I offer this plan as a practical framework for the next five years. We will measure progress through clear milestones and public reporting, and communities will remain involved in reviewing priorities and implementation. Together, we can build islands that are resilient, productive, inclusive and ready for the future.

HON. TEVIN ANDREWS

Candidate for Carriacou and Petite Martinique

FIVE-YEAR PROGRAMME PURPOSE AND VISION

This five-year constituency development plan brings together priorities for Carriacou and Petite Martinique in a single programme. It builds on the existing plan while adding specific early actions and major projects identified as priorities.

The central objective is to strengthen the everyday systems that allow people to live, work, learn, raise families, build businesses and participate in community life. The programme gives particular attention to health care, roads and public infrastructure, agriculture, culture, education and sport.

The long-term direction is a more connected, resilient and self-reliant constituency, with dependable public services and development that protects the character, heritage and natural resources of both islands.

FIVE-YEAR PROGRAMME

HEALTH CARE AND EMERGENCY SERVICES

Health care is a core priority. Residents should be able to obtain dependable primary care, medication, emergency support and essential social services without avoidable delays.

FIRST 100 DAYS

Publish dependable schedules for doctors, pharmacists, dentists and visiting specialists, including arrangements for Petite Martinique.

FIRST 100 DAYS

Improve medication continuity through stock monitoring, prescription follow-up and clearer referral arrangements.

FIRST 100 DAYS

Strengthen medical transfers through clearer protocols, better coordination and a transparent support mechanism for eligible patients and families.

YEAR 1

Assess appropriate emergency landing and rapid-transfer options, subject to aviation, land, safety and funding approvals.

FIRST 100 DAYS

Improve wheelchair and disability access at public buildings, transport points, tourism sites and community facilities.

YEAR 1

Develop regular programmes and accessible spaces for older persons, including recreation, community activities and appropriate transport support.

YEAR 1

Support affordable childcare and early-childhood services.

YEAR 1

Continue strengthening health infrastructure and emergency preparedness following Hurricane Beryl.

FIVE-YEAR PROGRAMME

ROADS, DRAINAGE, STREET LIGHTING AND PUBLIC INFRASTRUCTURE

Roads and drainage affect every part of daily life, from school and work to farming, fishing, tourism and emergency access.

FIRST 100 DAYS	Start the Top Dover Road project within the first 100 days, with construction proceeding through the approved project stages.
YEAR 1-5	Deliver a rolling programme of road rehabilitation, drainage, culvert, retaining-wall and sidewalk works.
YEAR 1-5	Prioritise high-risk locations including Mt Desire and Cross Road, Dumfries, Bogles and Prospect access roads, Grand Bay beach access, Mt Pleasant, Machala to Cassada Bay, Mangrove Road, Cemetery Road, Dover Top Road, Mt Royal and Petite Martinique's road network.
YEAR 1-5	Install and maintain streetlights in identified dark areas, prioritising school routes, junctions, residential areas and waterfronts.
FIRST 100 DAYS	Improve school-zone and pedestrian safety through bus stops, markings, signs, mirrors, lighting and appropriately engineered speed-control measures.
FIRST 100 DAYS	Strengthen enforcement against overloaded or unsafe cargo trucks, road obstructions, and dangerous driving.
YEAR 1-5	Repair roads damaged by utility works through stronger coordination with utilities and contractors.
YEAR 1-5	Continue phased development of public buildings and government-service infrastructure, including the Ministerial Complex where funding is available.

FIVE-YEAR PROGRAMME

WATER, ENERGY AND CLIMATE RESILIENCE

Water and energy resilience are essential to daily life, food production and emergency preparedness. The programme will strengthen water security, support practical renewable-energy solutions and improve the systems communities rely on before, during and after severe weather.

YEAR 1-5	Work with NAWASA to repair priority pipelines and tanks and improve dry-season distribution.
YEAR 1-5	Reactivate viable wells and springs following water-quality and engineering assessments.
YEAR 1-5	Expand rainwater-harvesting support for households, public buildings and farms.
YEAR 1-2	Support solar-powered irrigation and efficient water systems for farmers.
FIRST 100 DAYS	Advance assessment and phased delivery of desalination or other supplementary water supplies where technically and financially justified.
YEAR 1-5	Expand targeted solar and energy-resilience projects for essential public facilities, vulnerable households and productive enterprises.
YEAR 1-5	Strengthen hurricane preparedness through functioning shelters, emergency water and power arrangements, public information and resilient rebuilding standards.

FIVE-YEAR PROGRAMME

EDUCATION, SKILLS AND YOUTH DEVELOPMENT

Education will be the foundation for opportunity. The programme will combine school infrastructure with skills, special education, technical training, sports and pathways into employment.

YEAR 1	Begin construction of the Dover Government School, advancing the necessary design, funding, approvals, and procurement.
YEAR 1-5	Advance reconstruction and modernisation of other priority school facilities through funded designs and phased construction.
YEAR 1-5	Establish a coordinated special-education service, with dedicated learning spaces, adapted curricula, trained teachers, parent support and referral pathways.
YEAR 1-5	Strengthen age-appropriate social and emotional learning, mental-health awareness and early support within the education system.
YEAR 1-5	Expand boatbuilding, marine and navigational studies, agriculture, construction, craft, technology, hospitality and entrepreneurship training.
YEAR 1-5	Provide scholarships and certification support in priority fields, including STCW, captaincy, fishing, technical trades and special education.
YEAR 1-5	Develop an affordable accommodation arrangement for eligible students from Carriacou and Petite Martinique studying on mainland Grenada, subject to a costed operating model.
YEAR 1-5	Expand adult learning, digital skills and employment-linked training.
YEAR 1-5	Create regular after-school, summer and youth-development programmes.

FIVE-YEAR PROGRAMME

AGRICULTURE, FISHERIES AND LOCAL ECONOMIC OPPORTUNITY

Agriculture and fisheries are central to food security, livelihoods and the identity of the islands. The programme will focus on productive capacity, infrastructure, skills and access to markets.

YEAR 1-5

Make suitable government land available to qualified farmers through transparent productive-use arrangements.

YEAR 1-5

Support irrigation, rainwater harvesting, farm access and agricultural extension services.

YEAR 1-5

Strengthen a grow-what-we-eat programme connected to local markets and institutions.

FIRST 100 DAYS

Improve measures for stray-animal and livestock control with owner responsibility, identification and lawful enforcement.

YEAR 1-2

Deliver the Windward Fishing Centre Jetty and advance the Hillsborough Jetty, Petite Martinique jetty upgrade, cargo ramp, Malapom (Machala) jetty and access works.

YEAR 1-2

Advance engineered boat-hauling and small landing facilities for fishers in Mt Pleasant and L'Esterre/Lauriston.

YEAR 1-5

Improve fishing storage, water supply, sanitation, fish-cleaning areas and lighting at fishing communities and fish markets.

YEAR 1

Strengthen boatbuilding training and heritage through practical instruction, youth participation and documentation of local shipwrights.

YEAR 1

Pursue arrangements to reduce freight pressure on essential goods and improve cargo handling for Petite Martinique.

YEAR 1-2

Work with financial institutions and service providers to improve ATM access, digital payments and telecommunications for Petite Martinique.

FIVE-YEAR PROGRAMME

CULTURE, HERITAGE AND CREATIVE INDUSTRIES

Culture will be a central part of the future of Carriacou and Petite Martinique—not only something to preserve, but something to teach, practise, celebrate, and develop.

YEAR 1	Increase investment in cultural programmes, community traditions and cultural education.
YEAR 1-5	Protect and promote boatbuilding, Maroon traditions, the Carriacou Regatta, windmills, wells, springs, lime-making sites and other heritage assets.
YEAR 1-5	Support apprenticeships and youth participation in traditional skills, music, dance, craft, boatbuilding and other cultural practices.
YEAR 1-5	Document local history, oral traditions, traditional knowledge and the stories of communities and families.
YEAR 1-5	Strengthen cultural festivals through timely planning, community participation, transparent budgets and published results.
YEAR 1-5	Improve cultural and community spaces by refurbishing viable public buildings where practical.
YEAR 1-5	Develop cultural tourism opportunities that allow residents to benefit economically while protecting authenticity and community ownership.
YEAR 1-5	Work with schools and community organisations to ensure young people understand and participate in the cultural traditions of both islands.
YEAR 1-2	Cultural Centre – begin the construction process.

FIVE-YEAR PROGRAMME

SPORT, RECREATION AND COMMUNITY LIFE

Sport, recreation and community facilities support healthy lifestyles, youth development and stronger communities. The programme will improve facilities, expand organised activities and create safe, inclusive spaces for children, young people, adults and older persons.

FIRST 100 DAYS	Complete the tennis court project and place the facility into regular community use.
YEAR 1-5	Upgrade playing fields and recreation grounds in phased packages covering lighting, drainage, fencing, seating, access and maintenance.
YEAR 1-5	Establish regular coaching, summer, after-school and youth sports programmes.
YEAR 1-5	Support a wider range of sports and physical activities for children, young people and adults.
YEAR 1-5	Improve access to safe recreational spaces, including facilities suitable for persons with disabilities.
YEAR 1-5	Develop multipurpose community hubs where viable buildings can be refurbished for computer access, youth activities, senior programmes, fitness, craft and adult learning.

FIVE-YEAR PROGRAMME

**PETITE
MARTINIQUE**

Petite Martinique will be incorporated into constituency planning through a clear service focus that recognises the additional cost and logistical difficulty of delivering services on a smaller island.

YEAR 1-5	Advance the upgrade of the Petite Martinique jetty, including the cargo ramp.
YEAR 1-5	Improve road maintenance, drainage, lighting and public facilities.
YEAR 1-5	Strengthen access to health, education, financial and telecommunications services.
YEAR 1-2	Improve cargo handling and pursue practical measures to reduce freight pressure on essential goods.
YEAR 1-5	Advance coastal-protection and shoreline-resilience works at Albert Bay and other verified priority locations.
YEAR 1-5	Support fisheries, boatbuilding, agriculture, cultural activities and community recreation.

FIVE-YEAR PROGRAMME

TOURISM, ENVIRONMENT AND COASTAL PROTECTION

Tourism, the environment and coastal protection are closely connected to livelihoods, community safety and the long-term value of our natural assets. The programme will improve beaches and waterfronts, strengthen coastal resilience and sanitation, and support responsible use of marine and public spaces.

YEAR 1-5

Improve beaches and waterfronts through sanitation, public toilets, lighting, access, security, signage, landscaping, parking and managed marine activity.

YEAR 1-4

Implement the Paradise Beach Enhancement Project in practical phases.

YEAR 1-5

Install coordinated village, road, heritage, scenic and navigational signage.

YEAR 1-5

Strengthen sargassum and seaweed management, including collection, safe disposal and viable reuse partnerships.

YEAR 1-2

Restore priority mangroves and strengthen protection against illegal sand mining and dumping.

YEAR 1

Complete priority post-Beryl debris removal and maintain regular community clean-up schedules.

YEAR 1-5

Maintain cemeteries year-round, including fencing, walls, access roads and clear responsibility for upkeep.

YEAR 1-5

Advance the Albert Bay Rehabilitation Project and coastal-protection responses for Madam Pierre, Harvey Vale, Windward waterfront and other verified hot spots.

YEAR 1

Introduce beach-use and marine-safety arrangements, covering vehicles, parking, speedboats, swimmers, divers and small craft, for example, Paradise Beach and Sanchez Beach, Petite Martinique.

YEAR 1-5

Improve garbage collection and sanitation at public beaches, fish markets and waterfronts.

FIVE-YEAR PROGRAMME

LOCAL GOVERNMENT AND STRONGER COMMUNITY PARTICIPATION

Local government is intended to bring decision-making closer to communities. Within the first 100 days, the Local Government Bill will be taken to Parliament, and the implementation process will begin.

FIRST 100 DAYS

Advance the Local Government Bill through the parliamentary process.

FIRST 100 DAYS

Begin implementing the framework by following the required legislative and administrative steps.

FIRST 100 DAYS

Strengthen community participation in setting local project priorities.

YEAR 1-5

Use regular consultations to identify urgent needs and review project priorities.

FIRST 100 DAYS

Publish clear responsibilities for local maintenance and community facilities.

FIRST 100 DAYS

Develop a framework for regular communication between communities, local government structures and national agencies.

FIVE-YEAR PROGRAMME

MAJOR CAPITAL PROJECTS

Major projects will proceed through the required technical, land, environmental, financing, procurement and construction stages. The programme identifies the following as priority capital projects:

FIRST 100 DAYS	Top Dover Road — commence construction
YEAR 1-2	Hillsborough Jetty — begin the process toward construction.
YEAR 1	Dover Government School — begin the process toward construction.
YEAR 1-2	Windward Fishing Centre Jetty - complete construction
YEAR 1-2	Petite Martinique Jetty upgrade and cargo ramp - begin the process towards construction
YEAR 1-2	Malapom (Machala) Jetty and Access Works — Begin preparatory works and advance the project toward construction.
FIRST 100 DAYS	Tennis court - complete construction
YEAR 1-5	Playing Fields and Recreation Facilities — Begin phased rehabilitation and upgrades.
YEAR 1-5	Street Lighting Expansion and Restoration — Continue expanding and restoring street lighting across communities.
YEAR 1-5	Priority Coastal Protection Works — Begin targeted coastal protection works at Albert Bay and other verified erosion hot spots.
YEAR 1	Ministerial Complex - Begin phased development toward construction.
YEAR 1-2	Cultural Centre — advance planning and development toward construction.

FIVE-YEAR PROGRAMME

DELIVERY, ACCOUNTABILITY AND PUBLIC REPORTING

The programme will use measurable milestones rather than treating every commitment as an immediate construction promise. Major works will be reported by actual stage.

A 100-day report will identify completed actions, projects commenced, expenditure, approvals outstanding and next milestones.

Half-yearly public progress reports will identify work completed, work underway, responsible agencies, approved expenditure and funding sources.

Major delays will be reported together with the reason for the delay and the action being taken.

Annual constituency reviews will allow communities to review progress and recommend adjustments based on safety, need, readiness, funding and public benefit.

New capital works will include maintenance responsibilities, schedules and budgets.

Where delivery depends on national agencies, utilities, service providers or development partners, those dependencies will be clearly identified.

FIVE-YEAR PROGRAMME

LOOKING TOWARD THE FUTURE

The future of Carriacou and Petite Martinique will require more than individual projects. It will require stronger systems, better maintenance, investment in people, protection of culture and natural resources, and a clear plan for economic opportunity.

This programme aims to take both islands into the future while maintaining what makes them distinctive. Health care, education, agriculture, fisheries, culture, sport, roads, water, public infrastructure, tourism and environmental protection are interconnected. Investment in one area should strengthen the others.

The programme's success will be measured by practical outcomes: safer movement, better access to services, stronger opportunities for young people, productive farms and fisheries, active cultural life, usable sporting facilities, resilient communities, and public infrastructure maintained after it is built.

Carriacou and Petite Martinique should be places where people can live, work, learn, raise families, build businesses and grow older with dignity—while preserving the heritage, community identity and natural environment that make the islands home.

TRACKING OUR PROGRESS

**A PLAN ONLY MATTERS IF
PEOPLE CAN SEE WHAT IS
BEING DELIVERED.**

The People's Manifesto will not end with its publication. We will use it as a working document to track the commitments made to your community over the next five years.

We will review progress against the priorities identified in the manifesto, with updates showing what has been completed, what is underway, and what still requires attention.

This will give residents a clear way to follow the work, see how priorities are advancing, and understand where progress is being made.

**YOU HELPED SHAPE THE PLAN. YOU SHOULD ALSO BE ABLE
TO SEE HOW IT IS BEING DELIVERED.**

Online Progress Tracker

A dedicated website will list the commitments in the manifesto and show the status of each one — including what has been completed, what is in progress, and what is still to come.

Annual Community Review

Each year, we will return to the community to review progress, discuss what has been delivered, and hear directly from residents on what still needs attention.
